

IF YOUR WIRE DRAWING MACHINE COULD TALK:

It would tell you to regularly check its dies to ensure that operation is continuous and to the highest quality and speed of wire and cable production.

Fortunately you are now able to call upon 70 years rich experience of die maintenance and die workshop machinery from a global technological leader and for an easy reconditioning of all your costly wire drawing dies, made from tungsten carbide, natural diamond and PCD materials.

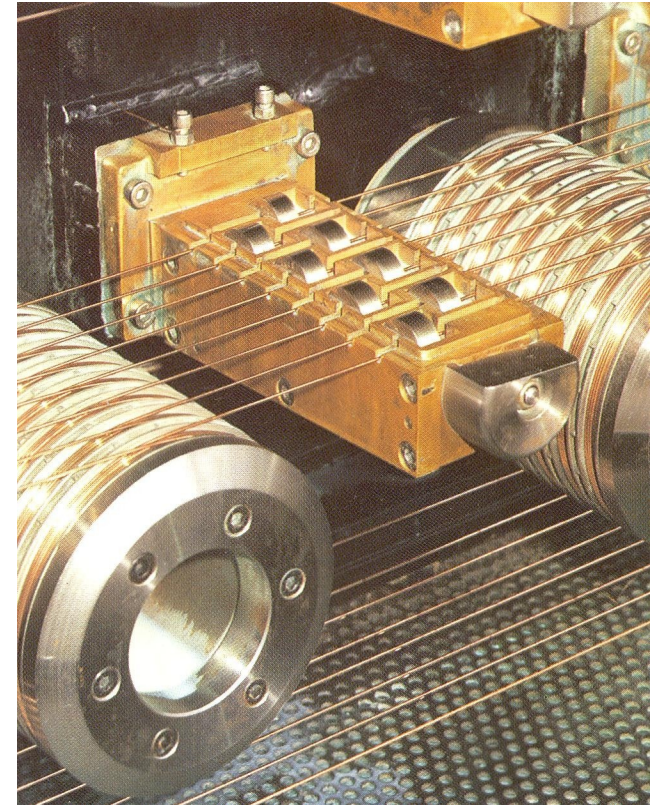

You can improve your wire drawing operations and achieve highest possible economy now.
